

# HOT JOB OF THE WEEK

---

## **Foreign Service Engineering Officer**

*United States Agency for International Development*

The United States Agency for International Development (USAID) has a long history of extending a helping hand to those people overseas struggling to make a better life, recover from a disaster or striving to live in a free and democratic country. It is this caring that stands as a hallmark of the United States around the world - and shows the world our true character as a nation.

USAjobs.gov control number: 1383896

---

### **In your position as Foreign Service Engineering Officer you will:**

- Assist in the planning, analysis, negotiation, implementation and evaluation of USAID engineering and construction projects.
- Manage U.S. Government resources, implementation teams, contractors and grantees to achieve specific program objectives.
- Serve as a technical resource to foreign assistance activities involving the design and implementation of infrastructure and other construction projects.
- Support engineering and infrastructure activities by researching, reviewing and analyzing data; providing assistance and advice on engineering and construction issues.

### **Requirements:**

- You must be a United States Citizen or National.
- Must have completed a bachelor's degree and a Master's degree in a field of study related to engineering, international development or a related field.

**Salary:** \$36,762 - \$53,986 per year

**Location:** Vacancies Worldwide

**Application Deadline:** October 29, 2009
