

HOT JOB OF THE WEEK

Hydrologist

*Department of the Interior,
U.S. Geological Survey*

Embark on an exciting future! From the peaks of the highest mountains to the depths of the deepest seas, the U.S. Geological Survey has career opportunities that make a difference in both the lives of others and in the environment. As an unbiased, multi-disciplinary science organization that focuses on biology, geography, geology, geospatial information and water, the U.S. Geological Survey is dedicated to the timely, relevant, and impartial study of the landscape, our natural resources, and the natural hazards that threaten us. Would you like to join the more than 10,000 scientists, technicians, and support staff of the USGS who are working in more than 400 locations throughout the United States? Apply today!

In your position as a Hydrologist you will:

- Be responsible for conducting hydrologic studies of considerable scope.
- Plan, conduct, document and properly archive studies related data, interpretations and other materials.
- Collect and analyze ground water and ground water-quality.
- Serve as a point of contact to the public and private sector through building strong cooperative relationships and presenting findings at industry specific conferences.

Requirements:

- You must be a United States citizen.
- You must meet the basic education requirement for a hydrologist. More specific details on USAjobs.gov.
- You must be willing to travel five nights per month.

Salary: 30,772.00 – 87,893.00 USD/ year
